Confidence Starts with Prevention

Join us for our **Congestive Heart Failure (CHF) Education Program**, an informative and supportive seminar presented by **Grace At Home** and focused on understanding CHF and reducing symptoms.

Learn about common symptoms, medications, heart-healthy diet tips, and when to notify nursing staff or health care provider. We'll also discuss daily habits like weight monitoring, low-salt eating, and important warning signs you shouldn't ignore.

Heart-healthy refreshments will be provided. Residents and their loved ones are encouraged to attend!
